EXPERIENCE

Genpact LLC | Remote, USA

May 2024-Present

Principal Consultant – AI Engineer

Mar 2026-Present

- **Lead architect** for an enterprise **Agentic xP&A platform** unifying Financial Planning, Supply Chain, Workforce Planning and Demand Planning across 4 business segments—set the **multi-agent reference architecture** and delivered an MVP in 1 month with a cross-functional team of 3 engineers and 2 SMEs.
- **Resolved engineering bottlenecks** by empowering finance users to curate KPI drivers directly using a custom application; architected a **Lakebase-backed governance layer** featuring versioned lineage (clone, edit, publish, audit) to replace Excel-driven driver registries and ensure robust agent dependency management.

Assistant Manager – AI Engineer

May 2024-Feb 2026

- **Automated financial reporting** by architecting a **multi-agent Conversational AI** platform integrated with Power BI; leveraged a LangGraph orchestrator to integrate 8 deterministic tools for natural-language analysis of Revenue, Cash Flow, and P&L—**reducing analysis lead time from days to minutes** for 100+ enterprise users.
- **Operationalized agent quality assurance** by implementing an **MLflow GenAI evaluation harness** utilizing LLM-as-a-judge scorers; transitioned subjective reviews into regression-tested SLAs, **boosting user acceptance from 40% to 60%** and preempting ~20 pre-production regressions.
- **Eliminated financial approval roadblocks** by engineering a **query-lineage governance layer** that surfaces underlying SQL and source datasets; implemented one-click rerun capabilities in Power BI and SQL to transition AI-driven analysis from a black-box model to a **fully auditable enterprise solution**.
- Built **scenario-based revenue forecasting** with **TimeGPT**, achieving **18% improved forecast accuracy at 5% MAPE**.
- **Automated complex credit memo processing** by architecting an end-to-end Generative AI pipeline on GCP and Salesforce to handle highly diverse document formats across 100+ companies; replaced manual workflows with **intelligent extraction** to process 2,000+ memos monthly with high precision.
- Built core components of **Contract CoPilot**, a **Generative AI and Knowledge Graph-backed RAG system** to address slow, manual contract management tasks - **reducing legal analysis time from weeks to minutes** by transforming multi-page contracts into an actionable system for Q&A, favorability assessment, and deviation analysis.

Keck Medicine of USC | Los Angeles, CA

Sep 2022-Dec 2024

Data Engineer - Contract

Feb 2024-Dec 2024

- **Unified analytics across data silos** by engineering a **multi-source data warehouse and analytics platform** on AWS Redshift, integrating Salesforce Data Cloud, Google Analytics, and CRM to support complex analytical research.
- **Accelerated downstream data activation** by engineering customer segments within Salesforce Data Cloud using tailored AWS pipelines (Lambda/RDS), resulting in a **30% increase in operational efficiency**.

Marketing Data Analyst

Sep 2022-Dec 2023

- **Streamlined campaign reporting pipelines** with the implementation of robust **AWS-based data ingestion and ETL pipelines** (Lambda, EC2, VPC, RDS), reducing data preparation time for reporting by **40%** and boosting ROI validation accuracy by **20%**.
- **Built a comprehensive data analytics platform** (Tableau, AWS, Looker) that **elevated campaign visibility by 54%** and engagement by **32%**.

Sayari Labs | Data Engineer Intern | Washington D.C

May 2023-Jul 2023

- **Built scalable microservice-style data pipelines** (Scrapy, Kubernetes, Airflow) to ingest and transform financial and corporate data from **10+ data sources monthly**, ensuring high availability and performance.

EDUCATION

Master of Science in Computer Science | University of Southern California, Los Angeles, CA | Jan 2022-Dec 2023 | GPA: 3.81/4.0

Bachelor of Engineering in Computer Science and Engineering | Anna University, India | Aug 2017-Jul 2021 | GPA: 8.97/10

PUBLICATIONS

P. Shekhar, R. Saha, M. J. B. Dudekula, **B. Chidambaram**. "Effectiveness of Retrieval Augmented Generation, Contextualized Examples and Prompt Finetuning on Data Enrichment, Cleaning and Master Data Creation." IEEE ACDSA, 2026. DOI: [10.1109/ACDSA67686.2026.11467982](https://doi.org/10.1109/ACDSA67686.2026.11467982)

SKILLS

- **Specialties:** Generative AI, Agentic AI, Deep Learning, ML Forecasting, Knowledge Graphs, Data Engineering
- **Languages & Tools:** Python (PySpark), SQL, TensorFlow, PyTorch, LangGraph, C, C++, Java, React
- **Platforms & MLOps:** GCP, Databricks, AWS, Azure, Kubernetes, Docker, MLFlow, Airflow, Jenkins, Kafka, Cassandra, Redshift, Salesforce Data Cloud
- **Certifications:** [Google Cloud Professional Machine Learning Engineer](#), [Databricks Generative AI Associate](#), [Google Cloud Associate Cloud Engineer](#)
